## HDE 2020-D-II

The HDE 2020-D stethoscope TourGuide receiver is comfortable to wear and integrates both the receiver and headphones. The powerful battery ensures up to 8 hours operating time.

The stethoscope receiver automatically deactivates itself the moment that it is taken off, thus battery life will be preserved. Tour participants will be able to individually adjust the volume through a rotary control on the receiver, without the need to even take the device off.

The LC display provides information of volume, battery status, quality of reception and the channel being listened to. Channels can easily be set and adjusted by using the middle buttons.
